Provider: \_\_\_\_\_

Family Vision Statement

Shared Vision Statement:

Background Needs	Target Needs	Activities/Services/Supports	Anticipated Outcomes
Needs rated with a '2' or '3' that will guide and intervention rather than be the focus of the intervention. These can also be trauma exposures (rated '2' or '3' or 'Yes'). These are typically static. Actionable needs not currently a priority are also placed here.	Needs rated with a '2' or '3' that are the intended target of the intervention. The target can also be clusters or groups of items that are hypothesized to have the same root cause.	Activities, services, interventions or supports aimed to address the target need.	Needs or strengths where you expect to see the effect of the intervention. These should identify functional improvements, rather than just symptom improvement.

Useful Strengths	Activities	Strengths to Build	Activities/Services/Supports

## Relevant Item Grid

Useful Strengths	Strengths to Build
Priority Needs – Child/Youth	Priority Needs – Caregiver(s)
